IMPORTANT ALERT

We are continuously monitoring Internet activities for any signs of cheating or misguided information. We are aware that there are a large number of websites who are **selling fake exams** and charging substantial prices for them. We will take immediate action if we find that the real exams have been compromised. **Please do not spend money or rely on such cheat sites.**

Introduction

The UiPath Certified RPA Associate (UiRPA) is expected to be able to (1) independently design and develop simple RPA solutions or (2) be a productive member of an automation team led by an experienced RPA Developer responsible for developing complex solutions using UiPath technologies.

This exam assesses knowledge and skills related to problem solving, process identification, and building **simple** automation solutions with UiPath platform components such as UiPath Studio, Robots, and Orchestrator.

UiRPA is the first step for professionals who want to build and assess their knowledge and skills towards their journey to become an Advanced RPA Developer, Solution Architect or RPA Architect.

Target Audience

The target audience for the UiPath RPA Associate v1.0 Exam include all technical and semi-technical roles such as:

- Junior RPA Developers
- RPA Developers
- Solution Architects
- Business Analysts
- System Administrators
- College/University Students and/or Graduates
- UiPath and Partner Employees in roles such as Pre-Sales, Services, Support, etc.

Minimally Qualified Candidate

The Minimally Qualified Candidate (MQC) is an individual with the following:

- No prior experience with Robotic Process Automation (RPA); however, the MQC has taken and completed UiPath RPA Developer foundational training from UiPath, its authorized partners, Academic Alliance institutions or other sources which satisfy learning for subjects being tested

- OR -

- 3 – 6 months' RPA hands-on experience

Products

Products covered on the exam include:

- UiPath Studio version 2020.10
- UiPath Robots version 2020.10
- UiPath Orchestrator version 2020.10

Exam Domains/Exam Sections

The UiPath RPA Associate v1.0 Exam contains the following exam sections:

- Robotic Process Automation (RPA) Fundamentals
- UiPath Studio Overview
- UiPath Studio – Variables and Arguments
- UiPath Studio – Selectors
- UiPath Studio – Control Flow
- UiPath Studio – Data Manipulation
- UiPath Automation Concepts and Techniques
- UiPath Orchestrator Overview

Exam Topics

Tasks performed by the Minimally Qualified Candidate:

Robotic Process Automation (RPA) Fundamentals

- Describe the processes suitable for automation and the processes executed with the different robot types; for example, attended versus unattended
- Explain the functionality and interactions of UiPath products; Studio, Orchestrator, and Robots/Assistant

UiPath Studio Overview

- Understand the debug functions and how they are used; for example, using Breakpoints
- Identify how to use Manage Dependencies and understand the significance of connecting an automation project to a version control solution

UiPath Studio – Variables and Arguments

- Describe the different variable types, how they are used, managed, and the best practice for using the variable scope
- Describe the functions and differences between variables and arguments; including how arguments are used, managed, and best practices

UiPath Studio – Selectors

- Identify and describe how dynamic versus static selectors are used
- Identify and describe how partial versus full selectors are used
- Identify and describe how and when to use Indicate Anchor in UI Explorer and the Anchor Base activity

- Demonstrate and describe the use of a reliable selector and how to use UI Explorer to modify selectors

UiPath Studio – Control Flow

- Explain how to use Control Flow activities and workflow types such as sequences and flowcharts
- Identify and describe the various Control Flow activities such as If, Switch, While, DoWhile, For Each, etc.
- Explain the importance of error handling and how it can be implemented

UiPath Studio – Data Manipulation

- Describe the importance and reasons why data manipulation is used; for example, conversion from one data type to another data type
- Explain how strings can be manipulated; for example, by using VB string methods and RegEx
- Explain how to iterate and manipulate data on various collection types and data tables

UiPath Automation Concepts and Techniques

- Identify and explain how e-mail automation is used
- Identify and describe Microsoft Excel and data table functions, and how Excel activities are used for data manipulation
- Describe the functions used to extract data from a .pdf file; for example, reading native text or using OCR

UiPath Orchestrator Overview

- Identify and describe how UiPath Orchestrator queues and assets are used
- Identify and explain how to publish projects to UiPath Orchestrator

Environments, Applications, and/or Tools

The Minimally Qualified Candidate (MQC) should be comfortable working with the following environments, applications, and/or tools:

- Microsoft Windows
- UiPath Studio
- UiPath Orchestrator
- Virtual environments (VMs)
- Browser (IE, Chrome, etc.)
- Version Control
- MS Office and/or MS Office Suite
- Notepad++ (or any other text editor)

Recommended Training and Hands-on Experience

The following represents the recommended learning path the Minimally Qualified Candidate (MQC) can take to prepare for the UiPath RPA Associate v1.0 Exam:

Training Options:

- **UiPath Academy** [RPA Associate Learning Plan](#) is a comprehensive online training for you to prepare for the Associate exam at no cost to you.
- OR -
- UiRPA aligned course at a UiPath Academic Alliance institution or at a [UiPath Learning Partner \(ULP\)](#) training organization:
 - Course Title: Robotic Process Automation Design & Development v3.0
- OR -
- **courseera** [Robotic Process Automation \(RPA\) Specialization](#) course which is aligned to UiRPA.
- OR -
- Other training or self-learning sources that cover the subjects listed in this document to prepare for the exam.

Hands-on Experience:

1. Developing an attended process (i.e., workflow)
2. Developing an unattended process (i.e., workflow)
3. Proof of Concept – creating and/or demonstrating
4. Experience resolving application changes and/or code changes
5. Peer code reviews

Recommended Exam Preparation

In addition to the recommended learning path, the practice test is an additional study tool to prepare for the UiPath RPA Associate v1.0 Exam:

- [RPA Associate v1.0 Practice Test](#)

Exam Details

Certification Tracks	UiPath Certified Professional 1. General Track 2. Developer Track
Specialty	Robotic Process Automation Developer
Credential	UiPath Certified RPA Associate v1.0 (UiRPA)
Exam Number and Exam Title	UiPath-RPAv1 - UiPath RPA Associate v1.0 Exam
Pre-requisite Exam(s) and/or Certification(s)	Though not a pre-requisite, UiRPA is strongly recommended for those interested in achieving UiPath Certified Advanced RPA Developer (UiARD) Certification.
Exam Duration	90 minutes
Passing Score	70%
Exam Fee	\$150.00
